

iBlaze – Comprehensive case tools and simplified administration

Lose the Need for Paper... Begin Saving Time and Money with CT Summation's In-House solution iBlaze.

The Simplicity of an All-in-One Solution

Track, store and organize all case materials

View any scanned or electronic document with a single mouse click

Enjoy immediate access to transcripts with a live feed from the court reporter

"Mark up" documents and pictures with digital pens, highlighters and other tools

Bates stamp, redact and segregate documents for production

Share materials safely with experts, co-counsel and opposing counsel

Make documents searchable with built-in OCR technology

"Freeze" searchable documents for safe and secure production

POWERFUL SEARCHING

Search across all your case documents with a single inquiry. Create broad, simplified searches using our Quick Search features, or use our robust "Terms and Connectors" technology for more complex, detailed searches. Feel secure in your searches of OCR text by drawing in potential OCR errors with our "Fuzzy Search" ability.

DOCUMENT REVIEW

The review tools allow fast and consistent coding of documents using case-customized Tags. Arrange your review screen just how you want it, and choose whether to display single or summarized document sets. Organize and segregate documents into Personal, Group or Case-wide Folders and organize documents requiring review into assigned Review Sets.

ORGANIZE CASE MATERIALS

Build your case from the ground up by making notes on transcripts and documents as you prepare for trial. Chronicle important dates and events in outlines or spreadsheets. Track key witnesses. Easily copy information from documents or transcripts into customized outlines.

IMPORTING AND EXPORTING DATA

Flexible import formats accommodate many types of documents and load files. New features allow easy creation of production sets and export to other CT Summation systems, as well as complementary applications including Microsoft Excel – shaving valuable time off privilege log creation and organizational tasks.

PORTABILITY

Work where you need to – at the office or on the road, through a local network or offline, simply by copying your entire case to your laptop.

SECURE DOCUMENT STORAGE

Safely store transcripts, video, OCR, email and attachments, as well as document coding and notations. Search concurrently across case documents including transcripts. Access work product through the Pleadings folder and make it searchable.

COMPREHENSIVE TRANSCRIPT TOOLS

Electronic transcripts eliminate the wait for your certified draft and allow you to instantly categorize, add searchable notes and highlight relevant text. Quickly and easily create summaries and witness examination outlines and compare documentary evidence to testimony. iBlaze's powerful searching capability allows you to instantly locate key passages and link them to relevant documents, video clips, websites and case evidence. Carry your entire case – transcripts, documents, outlines, chronologies – on your laptop.

View synchronized video in tandem with the transcript, search the text to locate the corresponding video and easily create video clips of persuasive testimony.

Scanned exhibits can be directly linked to related testimony, allowing convenient one-click viewing of the transcript passage and referenced exhibit side by side. Use markup tools to emphasize important areas of exhibits. Receive transcripts with linked exhibits via email.

TRANSCRIPT HIGHLIGHTING

The new highlighting tool allows users to electronically color-code transcript text, significantly enhancing an already-robust set of collaborative reviewing tools. Users can assign colors based on issue categories, or by members of the review team. With the highlighting tool, reviewers can immediately identify important transcript passages and issues.

LIVE FEED FROM THE COURT REPORTER

Realtime instantaneous transcription allows you to easily and discreetly mark areas for review or follow up questions, minimizing distracting note-taking. Designate in advance words or phrases to be highlighted as they arise, with relevant issues automatically attached. Use powerful searches across transcripts as testimony transpires.

INTERNET EXPLORER 7, OFFICE 2007 AND WINDOWS VISTA SUPPORT

We are pleased to announce full support of IE 7 and compatibility with Office 2007 and the Business edition of Windows Vista.
