

PRESENTATION SERVICES

Our Trial Services Department can provide complete presentation Services in mediation or trial utilizing a suite of specialized tools, including inData's TrialDirector. We will also work with any of your existing trial presentations created in other software, including existing PowerPoint.

DISPLAYING EVIDENCE

If you have hard-to-see exhibits like MRI scans, X-rays, Construction plans, graphs, timelines, photographs, and video, they can be projected onto an array of presentation equipment. There is no need to carry excessive loose demonstratives or multiple sets of exhibits. All your evidence can be stored on a secure medium and displayed on with monitors, set up in the courtroom so your evidence can be seen by everyone.

If your evidence is important enough to talk about, then it's important enough to be seen. Any person is more likely to believe an argument if they understand the facts. Spoken word often cannot accomplish that task alone. Effective demonstrative aids educate, involve, and clarify the complex issues of your case in a manner which makes them more understandable to both expert and layman. A good demonstrative aid draws the eye to itself, holds the interest of a juror when dry facts fail to do so. Tell them and they may forget; show them and they will remember.

The application of state of the art digital technology allows us to take demonstrative evidence in new directions. Affordable, customized exhibits accurately convey your ideas. Timelines are no longer a series of stark white boxes connected with black lines on a field of gray - but instead colorful expressions of your themes, ideas, and facts. Take a look at some of our examples and judge for yourself, then call to set up an appointment for consultation on your next case.
